Process certification

This process certification has been issued pursuant to BRL SIKB 7000, version 5, in conformity with the regulations of Normec Certification B.V. for the area of application of the protocol(s) set out above and as defined in Section 1.2 of this Assessment Guideline.

On the basis of the certification survey as conducted, Normec Certification B.V. hereby declares that it is justifiable to have trust in the (water) soil remediation and operations in the water table Struijk Sloop- en Grondwerken B.V. carried out, to the extent that such work forms part of the protocol(s) referred to in this certificate and within the scope set out in Section 1.2 of BRL SIKB 7000; the foregoing includes the secondary processes necessary from the point of accepting the instructions up to the completion and the documents in relation to that completion which persistently comply to the process specifications of this process certificate.

Normec Certification B.V. states that for the purposes of this certificate, there is no notification obligation and/or information requirement on the part of the user to the competent authority.

Pursuant to the Soil Quality Decree, this is a recognized certificate by the Minister of Infrastructure and the Environment, where the certificate forms part of the schedule of recognized soil intermediaries on the website of *Bodem+*; www.bodemplus.nl.

Upon acceptance, please inspect whether:

- Completion is as agreed;
- The mark and the way of marking are correct;
- The products (please refer to application and use) do not show any visible deviations.

Check whether this certificate is still valid, please contact Normec Certification B.V. for such purpose.

Check whether on the basis of this Certificate, the Minister of Infrastructure and the Environment designated the company within the scope of the Soil Quality Decree.

In the event of any complaints, a commissioning party may contact Struijk Sloop- en Grondwerken B.V. and if necessary Normec Certification B.V.

This certificate concerns a process certificate on the basis of the system of certification of processes supported by an audit of the management system (System 6), as set out in ISO/IEC Guide 17067.
